 Minh Khai, Bắc Từ Liêm, Hà Nội

 <https://github.com/trieuhai2002>

## Skills

### Font-end

-HTML, CSS(Tailwind, SCSS, Bootstrap)  
-Javascript(Vuejs, Reactjs)

### Back-end

Nodejs(ExpressJS, Sequelize(ORM), NestJS), C#  
(ASP.Net Web API)

### Skills English

+ Listen, Speaking, Reading basics

## My hobbies

Listening to music : Often listen to music in my free time  
Play football : Likes watching top soccer matches  
Gaming: Likes to play 5vs5 games in her free time

## Career goals

In future, I have become fullstack backend developer

## Education

**Ha Noi University Of Industry**

13/10/2020 - today

Information Technology

Student 4th - GPA:3.08

## Working experience

**Intern/Fresher Web**

06/06/2023 - 05/09/2023

Compay MISA

During more than 3 months of internship at MISA Company, I was assigned the task of a sample asset management project.

+ The asset management project is written according to the Client Rendering model. Frontend(Vuejs), Backend(ASP.Net web api).

+ The main functions I did include: Displays data from API calls CRUD assets, Pagination, search, Export data to Excel file

+ How to manually create components on a standard website according to the sample form  
How to manage code source code using Gitflow

Link github: [https://github.com/tuanledanh/HCSN-1/tree/main/MF1662\\_NHTrieu](https://github.com/tuanledanh/HCSN-1/tree/main/MF1662_NHTrieu)

+ In addition to the knowledge

+ I have learned and done, I also learned communication knowledge and the company's culture.

**Build backend API Ecommerce Shiofify**

15/11/2023 - 10/12/2023

Yourself

Link github: <https://github.com/trieu2002/Ecommerce-Shopify>

- Number of members: 01 (personal project), source code management with github

- Technology used: NodeJS + MongoDB, ExpressJS

+ Main function description

+ Use Postman to test API

+ Project is written according to the MCV model

+ CRUD product, category, user, blog, coupon...

+ Decentralize user and admin rights

+ Forgot password and change password using nodemailer

+ Build a Shopping Cart

+ Search, paginate, and sort products

+ Upload image with Cloudinary, Delete image on cloudinary

**Build website backend manager employee of company**

20/03/2023 - 30/03/2024

Yourself

+ Technology used: Nodejs(Express, Sequelize(ORM), MySQL, JWT +  
Description of main functions

+ CRUD and pagination search by employee, company, authority, project

- + Login, Register using Jwt to create access\_token and refresh\_token
- + Multilingual Backend side
- + Write centralized error handling middleware such as: error handler, locations,...
- + Decentralize system users and assign rights to users
- + Use redis to cache data
- + Config is used by the view engine as a template if necessary
- + Write customized middleware to handle errors for each individual case such as: duplicate code, Incorrect login, router not found error.....
- + Know how to use middleware to handle duplicate human data validation errors
- use send up
- + Upload image files using Multer saved locally
